

RoHS (Restriction of Hazardous Substances) & REACH (Registration, Evaluation, Authorization & Restriction of Chemicals)

AMAX / ACMA acknowledges its responsibilities and commitments in meeting the requirements of its customers for products that meet environmental compliance standards such as European Union (EU) RoHS Directive (2011/65/EU) and REACH Directive (EC 1907/2006).

RoHS Policy

All products manufactured and supplied by **AMAX / ACMA** are RoHS compliant. We ensure that the directives, procedures and requirements as set out in the RoHS directive (2011/65/EU) are maintained and complied.

AMAX / ACMA is ensuring that the following substances are not intentionally included in the manufacturing or packaging of any of our products:

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent Chromium (Cr⁶⁺)
- Polybrominated Biphenyls (PBB)
- Polybrominated Diphenyl Ethers (PBDE)

Per EU RoHS Directive, a maximum concentration value of 0.1% by weight in homogeneous* materials of Pb, Hg, Cr⁶⁺, PBB, PBDE and of 0.01% weight in homogenous Cd shall be included.

*which means that the limits do not apply to the weight of the finished product, or even to a component, but to any single substance that could (theoretically) be separated mechanically.

REACH Policy

AMAX / ACMA products are REACH compliant per European Commission EC 1907/2006. **AMAX / ACMA** supports the overall REACH objective of improving the protection of human health and environment. Amax is committed to meet all REACH requirements and is willing to provide our customers with information about the chemicals in our products as needed to comply with REACH.

The 155 SVHCs (Substances of Very High Concern) of REACH Candidate list is published at:
http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp

AMAX / ACMA has always been an environmentally responsible company. Going forward, **AMAX** fully intends to remain compliant with all new, emerging RoHS and REACH Directives.
